- Water purifying agents** - iodine or chlorine. If chlorine strength is unknown, add 10 drops per quart of water. Double amount of chlorine for cloudy or colored water or water that is extremely cold. The treated water should be mixed thoroughly and allowed to stand, preferably covered, for 30 minutes. The water should have a slight chlorine odor; if not, repeat the dosage and allow the water to stand for an additional 15 minutes. If the treated water has too strong a chlorine taste, it can be made more pleasing by allowing the water to stand exposed to the air for a few hours or by pouring it from one clean container to another several times.
